ISF Survey App Instructions

Note: If you are using the Survey123 ISF app, you will not need to upload your assignment map but you may want to print a hard copy for your reference. The app will plot your points using GPS coordinates so there is no need to load a map into it.

The following are steps to download the app and the surveys. It should be a quick and easy process!

1. The first thing that you will have to do is download Survey123 app, at the links below. It is available for iOS devices (iPhone and iPad) and Android devices. After you download the app, **please do not open the app yet**, as you will be presented a sign in screen that you are not going to use. You will **load a survey first**, before opening the app.
    1. iOS: https://goo.gl/0JHTG7
    2. Android phones: https://goo.gl/DL5p5I
2. Next, there is the ISF Survey Form to load. Please click this link **while on your smartphone**. When you click on the link, it will begin the loading process. **Please allow the process to finish, until you see the survey form screen, before interacting with your phone again.**

3. To exit a survey, click the **X** button on the top left of your screen and choose "**Close this survey and lose changes**."

4. After this, you can close the app, or use the left arrow button on the top left of your screen to navigate to your "My Surveys" screen.
5. NOTE: **Please** do you submit any data in the surveys prior to your training. Please select "**Close this survey and lose changes**" after the survey has open and you want to close it.

These are the instructions for downloading the app; if you have any questions after exploring it a little, let us know at invasives@NYNJTC.org!
